

API CONNECTION WITH ANCOTRANS

Upgrading with AncoAPI

Are you looking for ways to add more value to your business? Maybe you're already connected to our system in some way, but would like to gain smoother operations by increasing the amount and types of data exchanged? AncoAPI aids optimized processes.

Why update?

Ancotrans began offering transportation services in 1882 and in that time, we've encountered a number of different data exchange standards. We, therefore, believe it's optimal to streamline these options for more efficient, responsive processes. It no longer makes business sense for our customers, suppliers and us to integrate with older systems. The table below highlights the business benefits of integrating with AncoAPI.

The following parameters define the varying systems' standards:

★ Response time/speed + Short implementation time ● Detailed options ■ Updateable ▲ Possibility

Standards to choose among	ANCO API	EDIFact ¹	CSVEDI	XML	PDF
Orders	★ + ● ■ ▲	▲	▲ +	▲ +	-
Orderupdate	★ + ● ■ ▲	▲	▲	▲	-
Truck & Trace	★ + ● ■ ▲	-	-	▲ ³	-
Invoices	Q2/2020	▲ ⁵	-	▲ + ²	▲ +
Creditmemos	Q2/2020	▲ ⁵	-	▲ + ²	▲ +
Statements	Q2/2020	-	-	-	▲ +
PODs	Q2/2020	-	-	-	▲ +
MISC ⁴	★ + ● ■ ▲	-	▲	▲	-

- 1) These EDIFact formats are supported: IFTMIN D95B, IFTMIN D96A, IFTMBC D99B . Certain limitations comply.
- 2) Directly or through Tradeshift (OIOUBL XML).
- 3) Limited and with some delay (transport has to be completed first).
- 4) Container- and seal number. Forward functions for customs handling.
- 5) Only supported format is IFTMIN D93A.
