

# ANCOMODAL

**– reliable flexibility for  
your containers**

**ANCOTRANS**

## WHAT IS ANCOmodal?

As a totally new product line, ANCOmodal complements our well-known direct truck services. Headed by Matthias Averbeck and equipped with the best network of relevant suppliers, we are now offering intermodal transportation to and from all German ports as well as Rotterdam, Antwerp and selected Mediterranean ports. We combine the dense intermodal network in Germany and surrounding countries with our own trucking expertise on the last mile. We operate our own depot stocks at selected locations, so we can either reload/reuse your import units or offer your export booking the empty container you need from our own inbound flows. Of course we are always aware of freetimes and closings, ensuring you get the most out of your transports.

## WHY CHOOSE ANCOmodal?

We deliver – Improved efficiency for your containers. More capacity and more choice for your transports. Save CO<sub>2</sub> and reduce overall emissions. Increase your bottom line by benefiting from our procurement expertise. While we ensure the best rates, the best schedules and timely transportation, you can focus on your business and your clients.

## HOW DOES ANCOmodal WORK?

We select the most suitable route and rail/barge option based on your transport details. You will be informed about the schedule and all necessary information by our staff in Hamburg. Pricing will be tailor-made to your business and you can even gain access to our tariff tool, which covers all of Germany with just a click of the mouse.

## BURGHAUSEN

We can offer even more reliable flexibility with our new office in Burghausen in the south of Germany. Opened on 4th January and located about 80km east of Munich, our dedicated and experienced staff can offer specialised solutions in relation to the rail hubs in Munich, Ulm, Regensburg and Nuernberg. We operate our own depot on site and can offer truck transports as well as connected north- or southbound rail transports. To suit your specific needs.
