

# ANCOMODAL

**– reliable flexibility for  
your containers**

**ANCOTRANS**

## WHAT IS ANCOmodal?

ANCOmodal is both, an independent product line and an add-on to our well-known direct truck services. Headed by Matthias Averbek and equipped with the best network of relevant suppliers, we are offering state-of-the-art intermodal transportation to and from all German ports as well as Rotterdam, Antwerp and selected Mediterranean ports. We combine the dense and effective intermodal network in Germany and surrounding countries with our own trucking expertise on the last mile. On selected locations in Germany (e.g. Munich, Stuttgart, Ulm and others) we can offer handling and storage outside of the regular and crowded infrastructure. This helps to reduce your costs by increasing flexibility, reducing turnaround and standstill times and helping you to reload/reuse your import units or offer your export booking the empty container you need from our own inbound flows. Of course we are always aware of freetimes and closings, ensuring you get the most out of your transports.

## WHY CHOOSE ANCOmodal?

We deliver improved efficiency for your containers as well as more capacity and more choice for your transports. Save CO2 and reduce overall emissions. Increase your bottom line by benefiting from our procurement expertise. While we ensure the best rates, the best schedules and timely transportation, you can focus on your business and your clients. We have firm capacity on all regular products and can also offer access to the most specialized services available (such as prioritized night shuttles between selected hubs) or brainstorm on dedicated solutions with you.

## HOW DOES ANCOmodal WORK?

We select the most suitable route and option based on your transport needs. You will be informed about the schedule and all necessary information by our staff in Hamburg. Pricing will be tailor-made to your business and you can even gain access to our tariff tool, which covers all of Germany with just a click of the mouse.

## ONE STOP COMPETENCY

Count on our expertise and bundle your transports with us. All, some, for specific routes or areas or transport modes. We can make your resource be more efficient and focus on what is important for your KPIs. Together we will find the best possible solution for your transports.
